Generazione Changemaker

# Fabio Frattin

# Algor

## Problem I am contributing to solve

- ▣ Inequalities in **education** and lack of usage of cutting edge technologies for social good.

## My proposal for a solution

- Exploit the newest technologies, such as **AI**, to help students express their full potential.
- Build a digital environment where difficulties of any kind in education are smoothed.

## How I am doing it / with whom

- Algor Maps, the first web application that support students affected by SLD into building concept maps in an **automatic** fashion thanks to an AI algorithm.
- Algor is a team of Data Science students from **Politecnico di Torino**.

## Change I want to make happen

- 🚩 Education to become equal for granted.
- 🚩 Push the usage of AI to improve everyday life, having a concrete impact on people's life.
