Vox Populi Grassano

Problem I am contributing to solve

Lack of possibilities and opportunities for young people in Southern Italy

Minor rates of youth involvement in the decision-making process

National population showing limited knowledge of our region (Basilicata), its resources and its local communities

High rates of depopulation, unemployment and resistance to change/progress

My proposal for a solution

- Promoting positive examples of active citizenship from an early age, thus making everyone understand their value in the local community;
- Giving space to the spontaneous initiatives and ideas of young people;
- Using social media to raise awareness of the beauty and potential of remote areas;

How I am doing it / with whom

Change I want to make happen

To see my town fully confident while facing contemporary challenges and inspire citizens to actively promote our collective growth, making them proud of their origins anywhere they go.
